

ARE YOU IN THE RIGHT JOB?

WHAT YOUR SCORE MEANS

10–16

You'll certainly go places career-wise and your enthusiasm for your work is self-evident. However, you could be in danger of becoming a workaholic and a bore. Take things easy from time to time, get your priorities right, and don't push yourself so hard.

17–23

If you made a bit more effort, you could probably make your working day a great deal more exciting. It's unlikely you'll reach the top of the ladder where you are, and a change of location might do you good.

24–30

You're probably unhappy in your present job and resentful of your current working circumstances. Your attitude is no doubt reflected in the way you're treated by your colleagues. It would probably be a good idea to seek career guidance and consider making a brand new start.
