

WHO WANTS TO BE A MILLIONAIRE?

WHAT YOUR SCORE MEANS

9–16

You may, and probably will, make a great deal of money, but it won't buy you happiness. Greed is your motivator – it isn't the wealth you enjoy but the gaining of it. However much you have, you're never satisfied.

17–26

You're far too noble for your own good. Money for you is a way of buying approval from others and this makes you suffer a lot. Stop being so soft and start thinking of yourself.

27–36

Your problem is that you're frightened of letting yourself go. Although you're cautious nature enables you to find security, you have a tendency to feel guilty about enjoying yourself.

37–45

Money can be your way to the good life because you know how to use it wisely. You realise that the earning of money is only important when you can also enjoy spending it. And even if you never grow rich, you've learned how to be happy with what you have.
